

*Church Door, Inc.*

YOUR Hardwood Door Professionals

*Hurricane Impact Doors*

Protecting your home against the elements is of great importance to us. That's why here at *Church Door* we have developed our newest product, Hurricane Resistant Doors. Our Hurricane doors have been design pressure tested up to 50 psf and can withstand impacts with velocities of up to 15.2 m/s. We also use 5 point locking hardware to make for an extremely secure door.

Our Hurricane glass unit is 1" thick, constructed of one sheet of 5/32" thick clear tempered glass inboard, a sheet of 3/8" thick laminated glass outboard, and an aluminum spacer system. The 3/8" laminated glass is comprised of two sheets of 5/32" thick clear annealed glass and a 0.090" thick PVB inter layer. All of this provides the highest safety for your home and all of your belonging.
